Executive Summary

As young adults, what is the most important choice one would need to make?
CAREER PATH!

Rotaract Club of Bangsar realizes the need to help the youngsters in choosing their career path. RAC Bangsar itself has a lot of young members and guests who would definitely benefit with the career talks.

We had 5 speakers which are very well known. Our first speaker was Rotarian Michael who spoke on Banking Industry. He taught us how to handle our accounts and the updates on our world's economy. Secondly, Our very own President Surinder who spoke to us about Law. The rights and wrongs of today's world are immense, so we had a lot to catch up on that. Moreover, Rotarian GP Rao is currently in Human Resource and it's very important to get man power to run a business or multi-millionaire company. Besides that, From the Oil and Gas Industry was Rotarian Mike Selva. Talking about value of Oil in our country compared to the world. And last but not least a Lecturer on Hotel Management which was kinda interesting. To understand other peoples view of their jobs and they hard work is very important in life. Through our Rotary service, we learn to value each other, as human beings with human strengths and weakness. We learn that every one of us has something to give, and everyone has something to teach" he said. This quote inspired us to come out with this.

Objectives:

1. To help members and guests choose their career paths.
2. To build better relationship between the Rotaract Club and Rotary Club
3. To learn about the various jobs in the world.
4. To recruit new members by joining the talks.

Project Planning and Execution:

The planning of the Career Talks was very simple, whenever we had the chance, we would call up our Rotarians to come and speak to us. Then we will proceed to promoting it on Facebook and inviting our friends. The talks were given after our regular meetings.

The talks managed to tap into the following:

1. To develop professional and leadership skills

Members and guests involved learnt about the various jobs. By having question and answer sessions, guests were free to clear their doubts.

2. To provide opportunities for working in cooperation with sponsoring Rotary clubs

RAC Bangsar chose to invite the Rotarians from RC Bangsar to speak about their career. By doing this, members of the roatarct club could interact with the members of the rotary club and vice versa. Hence, a good relationship is formed.

Project Impact:

There were many members and guests involved in these career talks. We managed to help many guests to choose their career paths. Besides that, our relationship with RC Bangsar was also strengthened.
