

## Best Rotaract Club

By Choong Xiao Wen ( Rotaract Club of Pudu)

I personally think that Rotaract Club of Penang should be awarded as the Best Rotaract Club based on three main points which are commitments, projects impact and fellowship.

For the past one year, I can see that there is a tremendous improvement in the club under the leadership of Nicholas Goh. Being a young leader who took over the position as a president from experienced Rotaractors, I felt that he has done a good job increasing the numbers of rotaractors in the club and bringing the club to the next level. Rotaract Club of Penang has been actively participating in district activities and even club installation even though they have to go through a long journey all the way from the north. The level of commitments they have to the club is something that has impressed me.

In terms of the impact of their projects, I am impressed with their projects such as visitation to interact club to promote rotaract, Rac Penang Honk for Penang and project build a home. Their visitation to interact club is the best way to personally engage with the future young blood of the rotaract club. This will directly impact the member's recruitment in the future. Apart from that, I felt that their community projects are impactful as they are able to raise awareness to the public and truly benefited the community.

Finally, I personally felt that there is a strong bonding between their members in the club. Their continuous fellowship activities with their club members has really shown that they are as close as their own family members. This is something that I felt from looking at their pictures. Their pictures do really tell a story!!

As for the best Rotaractor award, I personally felt that Nicholas Goh deserve the award. It is due to his strong leadership as a president in the club. Apart from that, his commitment to the club as well as his humbleness as an individual has truly impressed. In my opinion, he is what I called as a true rotaractor. =D
